

The adventure clarified

Miguel Jorge Castro Pinho - 2014 ©

The taste of life , the experiences of everyday life , the hope of tomorrow that extends in perpetual day, the taste of adventure clarified sunrise every day after a night of sleep in which it intersects the total darkness and dreams , these dreams become reality if only for a moment if they were real and that would make our lives , but ours, for we are all like the sun and the wind to land adventure ... but dreams do not want to talk only to imagine how one thinks and reflects about something impenetrable , clarify thoughts whether real or not or adventure but it is my hope to one of recovery .

The structure of exploitation , which makes it more and more better to be respected even for a few crowds or small hopes that does not evaporate in the opinion of outsiders not felt ill-informed regarding our adventure to adventure today and extending for an adventure of tomorrow . Yes I wish that there is always tomorrow for without hope in life does not make that small or that they are the most difficult to clarify these dreams for a future of perpetual life can reach the goal of the game and just look at the end and see that could breathe and feel life ever, this same life that will one day make us live or be born again as a dream it is . Now 'd like to start from the beginning because we are now at the end of the same order of life that makes us clarify the beginning .

It all began on a summer day with my dad to meet my future mother on a summer day . I was born after dating for nine years that my parents had the time they met. How should happen to all families living extending the altars of the churches of eternal life lives communions vote of common life and ruled by the vows of forever. But also in most times or as little sense if either the current paradigm of history and has remained as always and forever maybe even only exception are the Greeks of ancient Greece in that perspective for the first time as a dream day turns out .

Unconscious to death , the same death that never expected but adventure can always happen, at least since about physical death the soul or parallel worlds of quantum mechanics that prolong life no one is sure , so always expect death never enough so as not to suffer even for

seconds, minutes , or several years . Since we must always be prudent to have a life full of hope that life is perpetuated and then later have eternal life because this is what I believe the oracle says .

Oracle why not present yourself . How do you know these things , the same things that lead to wars passionate unconscious by the spirit of adventure almost always for reasons that were explained a long time could be solved in simple ways . Give each of you have to have the right gift for that one to be independent , supreme, intelligent and knows what is best for everyone always with the awareness that the world we live in is always full of inequalities that are measured in various stages of life . Oracle says - In the world there are politicians but among them there are several ethical issues that are not long . So you are a being who knows everything ? Everything I 'm not adapting to life that presents itself through the action performed by members of that world, the world of passions , mistakes, unconscious adventures of war, misunderstanding of messages transmitted , the confused emotions , intelligence does not worked , the difference to be for equality , lack of work, the insane ambitions . There are simple ways to improve the world , but it seems that politicians do not have associative horizons of creativity to attempt to clarify the new generations , to improve those who already think they know everything , as the oldest , the strongest since the world is always difficult to have it all as always writes many boast the strongest but they forget that these had to be strong to leave behind many who were weak and could also be better since the middle of the action thought could also be written in the history books at least clarified the ocean of life , for he always knew that the strong are the ones that dominate are those that view always leaving behind many members . For all this we enjoyed the adventure is always clear for everyone but it might bring a revolution that same revolution that already know a long time but no one ever managed to clarify and try to disclose terms so many ways , demanding and diverse , strong adventures but above all passionate clarified. Maybe this says it all for the magic , for those who have reached the end and looked back and realized that was not for these enlightened but I want to mention and certainly I the narrator of the book , in that no one cares because I'ma be imagined , perpetuated the hope that the way to bring enlightenment , seeking, but always live with many restrictions and those wise words transmitted by those who are older or lived life clarified.
